

death due to pneumoconiosis, a claimant must prove that:

(1) The miner had pneumoconiosis (see § 718.202);

(2) The miner's pneumoconiosis arose out of coal mine employment (see § 718.203); and

(3) The miner's death was due to pneumoconiosis as provided by this section.

(b) Death will be considered to be due to pneumoconiosis if any of the following criteria is met:

(1) Where competent medical evidence establishes that pneumoconiosis was the cause of the miner's death, or

(2) Where pneumoconiosis was a substantially contributing cause or factor leading to the miner's death or where the death was caused by complications of pneumoconiosis, or

(3) Where the presumption set forth at § 718.304 is applicable, or

(4) For survivors' claims filed after January 1, 2005, and pending on or after March 23, 2010, where the presumption at § 718.305 is invoked and not rebutted.

(5) However, except where the § 718.304 presumption is invoked, survivors are not eligible for benefits where the miner's death was caused by a traumatic injury (including suicide) or the principal cause of death was a medical condition not related to pneumoconiosis, unless the claimant establishes (by proof or presumption) that pneumoconiosis was a substantially contributing cause of death.

(6) Pneumoconiosis is a "substantially contributing cause" of a miner's death if it hastens the miner's death.

[78 FR 59114, Sept. 25, 2013]

§ 718.206 Effect of findings by persons or agencies.

Decisions, statements, reports, opinions, or the like, of agencies, organizations, physicians or other individuals, about the existence, cause, and extent of a miner's disability, or the cause of a miner's death, are admissible. If properly submitted, such evidence shall be considered and given the weight to which it is entitled as evidence under all the facts before the adjudication officer in the claim.

Subpart D—Presumptions Applicable to Eligibility Determinations

SOURCE: 65 FR 80045, Dec. 20, 2000, unless otherwise noted.

§ 718.301 Establishing length of employment as a miner.

The presumptions set forth in §§ 718.302 and 718.305 apply only if a miner worked in one or more coal mines for the number of years required to invoke the presumption. The length of the miner's coal mine work history must be computed as provided by 20 CFR 725.101(a)(32).

[78 FR 59114, Sept. 25, 2013]

§ 718.302 Relationship of pneumoconiosis to coal mine employment.

If a miner who is suffering or suffered from pneumoconiosis was employed for ten years or more in one or more coal mines, there shall be a rebuttable presumption that the pneumoconiosis arose out of such employment. (See § 718.203.)

§ 718.303 [Reserved]

§ 718.304 Irrebuttable presumption of total disability or death due to pneumoconiosis.

There is an irrebuttable presumption that a miner is totally disabled due to pneumoconiosis, that a miner's death was due to pneumoconiosis or that a miner was totally disabled due to pneumoconiosis at the time of death, if such miner is suffering or suffered from a chronic dust disease of the lung which:

(a) When diagnosed by chest X-ray (see § 718.202 concerning the standards for X-rays and the effect of interpretations of X-rays by physicians) yields one or more large opacities (greater than 1 centimeter in diameter) and would be classified in Category A, B, or C in:

(1) The ILO-U/C International Classification of Radiographs of the Pneumoconioses, 1971, or subsequent revisions thereto; or

(2) The International Classification of the Radiographs of the Pneumoconioses of the International Labour Office, Extended Classification

§ 718.305

20 CFR Ch. VI (4–1–14 Edition)

(1968) (which may be referred to as the “ILO Classification (1968)”); or

(3) The Classification of the Pneumoconioses of the Union Internationale Contra Cancer/Cincinnati (1968) (which may be referred to as the “UICC/Cincinnati (1968) Classification”); or

(b) When diagnosed by biopsy or autopsy, yields massive lesions in the lung; or

(c) When diagnosed by means other than those specified in paragraphs (a) and (b) of this section, would be a condition which could reasonably be expected to yield the results described in paragraph (a) or (b) of this section had diagnosis been made as therein described: *Provided, however*, That any diagnosis made under this paragraph shall accord with acceptable medical procedures.

§ 718.305 Presumption of pneumoconiosis.

(a) *Applicability*. This section applies to all claims filed after January 1, 2005, and pending on or after March 23, 2010.

(b) *Invocation*. (1) The claimant may invoke the presumption by establishing that—

(i) The miner engaged in coal-mine employment for fifteen years, either in one or more underground coal mines, or in coal mines other than underground mines in conditions substantially similar to those in underground mines, or in any combination thereof; and

(ii) The miner or survivor cannot establish entitlement under § 718.304 by means of chest x-ray evidence; and

(iii) The miner has, or had at the time of his death, a totally disabling respiratory or pulmonary impairment established pursuant to § 718.204, except that § 718.204(d) does not apply.

(2) The conditions in a mine other than an underground mine will be considered “substantially similar” to those in an underground mine if the claimant demonstrates that the miner was regularly exposed to coal-mine dust while working there.

(3) In a claim involving a living miner, a miner’s affidavit or testimony, or a spouse’s affidavit or testimony, may not be used by itself to establish the existence of a totally dis-

abling respiratory or pulmonary impairment.

(4) In the case of a deceased miner, affidavits (or equivalent sworn testimony) from persons knowledgeable of the miner’s physical condition must be considered sufficient to establish total disability due to a respiratory or pulmonary impairment if no medical or other relevant evidence exists which addresses the miner’s pulmonary or respiratory condition; however, such a determination must not be based solely upon the affidavits or testimony of any person who would be eligible for benefits (including augmented benefits) if the claim were approved.

(c) *Facts presumed*. Once invoked, there will be rebuttable presumption—

(1) In a miner’s claim, that the miner is totally disabled due to pneumoconiosis, or was totally disabled due to pneumoconiosis at the time of death; or

(2) In a survivor’s claim, that the miner’s death was due to pneumoconiosis.

(d) *Rebuttal*—(1) *Miner’s claim*. In a claim filed by a miner, the party opposing entitlement may rebut the presumption by—

(i) Establishing both that the miner does not, or did not, have:

(A) Legal pneumoconiosis as defined in § 718.201(a)(2); and

(B) Clinical pneumoconiosis as defined in § 718.201(a)(1), arising out of coal mine employment (*see* § 718.203); or

(ii) Establishing that no part of the miner’s respiratory or pulmonary total disability was caused by pneumoconiosis as defined in § 718.201.

(2) *Survivor’s claim*. In a claim filed by a survivor, the party opposing entitlement may rebut the presumption by—

(i) Establishing both that the miner did not have:

(A) Legal pneumoconiosis as defined in § 718.201(a)(2); and

(B) Clinical pneumoconiosis as defined in § 718.201(a)(1), arising out of coal mine employment (*see* § 718.203); or

(ii) Establishing that no part of the miner’s death was caused by pneumoconiosis as defined in § 718.201.

(3) The presumption must not be considered rebutted on the basis of evidence demonstrating the existence of a
